

Quality Management System – ISO 9001

ISO 9001 specifies the requirements for a quality management system (QMS). This ensures that companies consistently produce services and goods that meet both customer and regulatory requirements. At TAG Construction Ltd our aim is to exceed these standards on a daily basis. With our very talented fulltime employees on board we continue to increase awareness of the importance of quality in the services we deliver to our customers. Here are some of the steps we have taken so far:

1. Applying quality management strategies ensures that our build quality is superior to our competitors.
2. Our methodology is clear and in line with the requirements set forth.
3. TAG Construction Ltd.'s adherence to legislation is consistent, thus confirming our consistent quality of service.

The most important aspect for TAG Construction Ltd regarding ISO 9001 is the continual improvement we drive as a team year after year. This in turn helps our great company grow and thrive within the industry, increasing our profits, growing our business and essentially making everybody very happy.
